Guidelines for Water Damage and Mold Claims - New Business

The risk is not eligible if any of the following apply:

1. More than one paid non-appliance related water damage claim* in the past 3 years filed by the applicant or on the subject location.
2. A mold claim has occurred at the subject location in the past 3 years and the applicant fails to provide a Certificate of Mold Damage Remediation (MDR-1). Risks cannot be bound until the required **Certificate of Mold Damage Remediation (MDR-1)** is submitted to Underwriting.
3. Three or more paid appliance-related water damage claims** in the past 3 years filed by the applicant or on the subject location. If more than one appliance related water loss exists, risks cannot be bound until the required **Certificate of Appliance-Related Water Damage Remediation (WDR-1)** is submitted to Underwriting.

Definitions

* **Water damage claim**--A request by an insured for indemnification from an insurer for a loss arising from the discharge or leakage of water or steam that is the direct result of the failure of a plumbing system or other system that contains water or steam.

Note: If the subject location has had a water loss within the past 3 years, which was the result of a plumbing system failure, we will require an inspection by a qualified plumbing contractor which confirms the plumbing system is in good condition with no leaks and has no interior water supply lines made of lead.

Appliance-related claim--A request by an insured for indemnification from an insurer for a loss arising from the discharge or leakage of water or steam from an appliance that is the direct result of the failure of the appliance. An appliance means a household device operated by gas or electric current, including hoses directly attached to the device. The term includes air conditioning units, heating units, refrigerators, dishwashers, icemakers, clothes washers, water heaters, and disposals.

II. CONDITION OF DWELLING/CONDOMINIUM:

A. The dwelling and all major systems (plumbing, heating, electrical, roof) must be in good condition and have no unrepaired conditions or any uncorrected fire or building code violations. If the dwelling is more than 25 years old, the Modernization Section of the ACORD Homeowners application must be completed. All dwellings are subject to inspection.

Modernization Requirements:

- Roof must have been replaced within the past 25 years (except tile roofs or similar “lifetime” roof materials); if the roof is over 15 years old, the ACV Loss Settlement Endorsement is required.
- Oil furnace/burner cannot be older than 25 years or gas furnace/burner cannot be older than 35 years; and
- Electrical must have circuit breakers in whole or in part.

B. Heating must be a central heating system or thermostatically controlled electric heating system. If the central heating system includes a wood or coal burning furnace as the primary heat source, the dwelling must have a backup oil or gas central heating system or thermostatically controlled electric heating system. (Note: A converted coal furnace, kerosene heater, electric space heater, wood, coal, or pellet stove, or other wood burning device cannot be the primary source of heat). All wood, pellet and coal stoves or other wood burning devices (excluding fireplaces) require completion of the Supplemental Heating Questionnaire. These stoves must be professionally installed or approved by the local fire department or building inspector.

C. Dwellings must be insured to 100% of Replacement Cost using costs associated with actual year built (e.g. homes built prior to 1940 must use “Pre-1940“ costs). Pre-1940 homes using “Standard” replacement costs to determine Coverage A replacement cost are acceptable only when the Functional Replacement Cost Coverage is included on the policy.

III. RISKS INVOLVING THE FOLLOWING MUST BE REFERRED TO AN UNDERWRITER:

A. Risks with 3 or more losses (all types and amounts) in the past 5 years.

B. Risks with 1 or more weather losses (including CATs) greater or equal to $100,000 in the past 3 years.

C. Risks with 1 or more non-weather losses greater than or equal to $40,000 in the past 3 years.

D. Is located out of state, unless a prior agreement exists between the company and the agency. If the agent has appropriate non-resident licenses, the risk may be submitted unbound for consideration.

E. Has previously been cancelled, declined, or non-renewed in the past 3 years.

Rule 301 Premium Calculation

A. Premiums for all forms are developed from statewide premium for certain, individual perils. Each premium is then adjusted by factors, resulting in a premium for that peril that reflects the characteristics of the specific exposure. After all factors have been applied, all peril premiums are added together to produce the combined peril premium. The Total Policy Premium is determined by adding any premiums for additional coverages and endorsements that are not rated in the peril premiums to the combined peril premium.

1. From the base premium table, select the base premium for each peril as shown for the applicable company in which the policy is to be issued.

2. From the Territorial Relativity Table, select factors for each peril in the applicable company.

3. From the Tier Factor Table, select factors for each peril in the applicable company.

4. From the Rule 301.A.4 rate pages, select factors for each peril based on the construction, protection class and other risk characteristics, as applicable. See Rule 400-410, 412 and 424.

5. From the Rule 301.A.5 rate pages, select factors for each peril based on the appropriate risk characteristics, as applicable. See Rule 415-420.

6. From the tables for Rule 301.A.6 rate tables, select factors for each peril for all coverages and increased limits that apply.

7. From the Rule 301.A.7 rate pages, select factors for each peril based on the combination of other policies in force for the applicant/insured with Travelers. See Rule 425.

8. From the Rule 301.A.8 rate pages, select factors for each peril from each of the following tables:

a. Company Deviation (see Rule 426)

b. Miles to Fire Department (see Rule 429)

c. Early Quote Discount (see Rule 418)

9. Multiply each peril base rate by the peril specific factors that were selected in steps 2. through 8. above.

10. Calculate the Peril Expense Allocation based on the company, form and expected policy longevity using the tables in Rule 301.A.10 rate pages. Distribute the total expense allocation amount to the individual perils based on the ratio of each individual peril premium to the combined premium for all perils. See Rule 701.

11. Add the results from step 10. to the results in step 9. for each peril.

12. Multiply the results in step 11. by the factor for each peril in the Transition Modification Factor Table. Round the result for each peril to the nearest cent. (Round $.005 or more up to the next whole cent.)

13. Add the results in step 12. for all perils and round to the nearest dollar. (Round $ .50 or more up to the next whole dollar.) The result is the combined peril premium.

Rule 301 Premium Calculation (continued)

18. Multiply the premium developed in step 17 by the factor from Rule 413 to develop the Green Discount.

19. Add the rounded premiums developed in Steps 13, 14, and 16, then subtract the rounded premium developed in step 18. The result is the total policy premium.

Note: Policy premium may be subject to a minimum premium – see rule 213.

B. INTERPOLATION (desired limit is lower than highest limit in table):

1. Procedure - For each peril:

a. From the Limit Factor Table, determine the next higher limit and the next lower limit than the desired limit.

b. Subtract the lower limit from the desired limit and divide this result by the difference between the higher limit and the lower limit.

c. Determine the Factors for each of the higher and lower limits.

d. Subtract the lower limit's Factor from the higher limit's Factor and multiply by the result from **b.**

e. Add the result from **d.** to the lower limit's Factor. The result is the Factor for each peril for the desired limit.

2. Example. (The Limit Table Factors in the following example are for illustration only and are not necessarily the factors shown in the Limit Table Factor of this Manual.)

Assume the desired limit is $203,000, and that this limit is not in the Limit Factor Table. Also, assume that the next lower limit in the table is $200,000 and the next higher limit is $205,000. The Factors for these limits for a particular peril are 2.837 and 2.937, respectively.

Following the steps above,

a. The next lower and next higher limits are $200,000 and $205,000

b. ($203,000 –$200,000) **/** ($205,000 –$200,000) = $3,000 **/** $5,000 = 0.60

c. The Factors for a certain peril are 2.837 for $200,000 and 2.937 for $205,000

d. (2.937 – 2.837) x 0.60 = 0.06

e. 0.06 + 2.837 = 2.897 = Limit Factor for $203,000.

C. EXTRAPOLATION (desired limit is higher than highest limit in table):

1. Procedure - For each peril:

a. Subtract the highest limit in the Limit Factor Table from the desired limit and divide by $5,000.

b. Multiply the result by the factor for "Each Additional $5,000".

c. Add the product from **b.** to the Factor for the highest limit shown. The result is the Factor for the desired limit.

Rule 301 Premium Calculation (continued)

2. Example. (The Limit Table Factors in the following example are for illustration only and are not necessarily the factors shown in the Limit Table Factors in this Manual.)

Assume the desired limit is $460,000, and that the highest limit in the Limit Table is $300,000. Also assume that the Limit Table Factor for $300,000 is 2.968, and that the factor for "Each Additional $5,000" is 0.053.

Following the steps above,

a. ($460,000 -$300,000) **/** $5,000 = 32.0

b. 32.0 x 0.053 = 1.696

c. 1.696 + 2.968 = 4.664 = Limit Factor for $460,000
